

CVT-Cardiac Sonography

Did you know that heart disease is the number one killer of men and women in the United States.

One of every four deaths is related to heart disease.

HACC, Central Pennsylvania's Community College is your pathway to decrease this number.

At HACC you can earn an associate's degree in cardiac sonography and invasive cardiovascular technology.

For the cardiac sonography students Basically, it's learning how to take an ultrasound of the heart.

They can work in an outpatient facility like a cardiology office or they can work in a hospital setting.

The invasive CVT program is an associate degree program.

The patient comes in, they have the procedure where you take pictures of their heart under radiation with catheters and wires that you feed up into the heart and then you can help diagnose them and help them with either being medicated or doing an interventional procedure.

If you definitely really love helping people that's the field you want to be in.
